

# Kitty Wells, Nobody But A Fool (Would Love You)

Nobody but a fool would love you after the way you done me

Broke every vow you made me broke every rule

Who'd lie awake all night cry till you were out of sight

Loving you with all of her might nobody but a fool

I don't know what it was that made me trust you like I did

Stars got in my eyes or eiter rocks got in my head

All I knew was your two lips kissed me heavenly

Till yesterday those tender lips kissed goodbye to me

Nobody but a fool would love you...

[ steel ]

Well people tried to tell me how you'd hurt me I suppose

But I was blind as any bat and deaf as any post

You caught me like a tiger I loved you like a lamb

And knowing I still do just shows me up for what I am

Nobody but a fool would love you...

Nobody but a fool nobody but a fool
