

Kitty Wells, You Don't Love Me (But You're Afraid

You always have your way with me each time you left my heart felt the chill

But I've only been a past time to you

No you don't love me but you're afraid somebody will

You're afraid someone else will come along who cares

Someone whose love I could share

You've given promises you won't fulfill

No you don't love me but you're afraid somebody will

[steel]

You always have your way with me you never gave my heart love it could feel

The love you give to me is not real

No you don't love me but you're afraid somebody will

You're afraid someone else will come...
