

# Klaatu, At The End Of The Rainbow

"At The End Of The Rainbow"  
(Dee Long)

One day when life is taking you nowhere  
And you need someone who really cares  
When the love that you lost is found  
And you will want me around  
I'll meet you at the end of the rainbow

As you walk through this world I'll be there  
With you wherever you may go  
And although you'll never see me  
One day you are gonna need me  
At the end of the rainbow

Since you left I have felt the changes  
You drained away my life in stages  
But deep inside something lets me know  
Though history still turns its pages  
I will track you through the ages  
And we will meet again  
Somewhere at the end of the rainbow  
At the end of the rainbow
