

# KMFDM, Get Out Of My Head

Forget what you've been told  
Conceal the truth you know  
The phoenix fights desire  
And you know just what I mean  
In my cells you're in my soul  
What you can't touch you'll never hold  
You ask beg you plead

Get out of my head

Just a little too late  
Been so long gotta do a double-take  
I don't remember your face  
It's all the words and the way that we relate  
Don't belong don't believe  
Mind in motion makes me weep  
Twistind 'til I transmutate  
Reinstate deactivate  
Colossal information  
Short-circuit detonation

Sink deep  
Trip switch is on the blink  
Divide conquer  
What you will is what you bring on  
Emotions flight  
Red comet glare ignite  
Free fall  
Against yourself you fight

Get out of my head  
No letting go
