Komodo, The Wind Of Love (feat. Dhany)

The wind of love between us
It is something that we need to survive
A strenght from above around us
Can you feel it
Can you feel it inside

Do you get this feeling
Each time we stay together?
We are little fragments of the same energy
I just need your heating
In every stormy weather
Only your good love can make me feel so free
Free to show my very deepest passion
Free to search for higher satisfaction
There's no better place in my life
Than being right here laying by your side

Isn't it daydreaming
Each time we stay together?
We are little pieces of the same harmony
I can hear your beating
I'm lighter than a feather
Only in your arms i really feel so free
Free to open up all my emotions
Free to search for love and for devotion
There's no better place in my life
Than being right here laying by your side

The wind of love between us
It is something that we need to survive
A strenght from above around us
Can you feel it
Can you feel it inside
