

# Kreator, Pandemonium

Pandemonium all around  
Can't you feel it coming down  
Pandemonium in my brain  
Over and over and over again  
Over and over and over again  
Over and over and over again  
Over and over and over again

And now you know the answer  
And now you see the truth  
Swallow this bitter pill  
As all religion dies for you  
and all the things that happened  
In all those times long gone  
Gave birth to life like lies  
Apocalyptic pandemonium  
Pandemonium

Pandemonium in the air  
god has left us in despair  
Desperate could not stand the pain  
Over and over and over again  
Over and over and over again  
Over and over and over again  
Over and over and over again

Now that your world is burning  
Now that it ends in tears  
Inferno has arrived  
Nothing can make it disappear  
And all the things that happened  
In all those times long gone  
Gave birth to life like lies  
Apocalyptic pandemonium  
Pandemonium

A psychodrama is dragging you  
Out of a life surreal  
A better future waits for you  
A life that might have been  
So give your soul and you may live  
Limitless fantasies  
This celebration of the night  
Can light your shattered life  
If you believe...
