

Kultiration, Forward On

So long, been hiding for so long,
shadows grow so strong
But so fragile in the light of knowledge
Forward on, will is mute and will is clinging on,
in Babylon, can't find no light and no salvation

Youth man, hold your head up high and
Reach in for the light of the most high
Hold your head up high
Chanting, embracing, meditating

Youth man, hold your head up high and
Reach in for the light of the most high
Hold your head up high
Breathing, feeling, serving forever

Arise and be thy light,
let us be growing together in the right direction
Change shall bring our reconciliation,
as the fruits of tomorrow are planted today,
now is the time of our own redemption

So long, been neglecting faith for so long,
now I'm feeling it so strong
Yes, bright just like the moonlight

Moving forward on,
embracing this day like there is no other one
Moment by moment
I'm watching this lion
conquer land and sea but foremost the man inside of me

Youth man, hold your head up high
Reach in for the light of the most high
Hold you head up high
Love yourself in and through, everywhere, all the time
Youth man, hold your head up high
Reach in for the light of the most high
Hold you head up high
So High.

Arise and be thy light,
let us be growing together in the right direction
Change shall bring our reconciliation,
as the fruits of tomorrow are planted today,
now is the time of our own redemption.
