

Kylie Minogue, I Love It

Waiting for your love
Was enough to go break my heart
Not being close to you
It made my world fall apart

I was like a lonely star at night
Waiting for someone to share the light
Love like this no one can take
a way /3x

your love is my love
and my love is all you need

so come on let the music play
we're gon' take it all the way
i love it /3x
wee oh
dance through the darkness
together eternally
so come on let the music play
we're gon' take it all the way
i love it /3x

blowing my mind every time
that you wishper my name
say it again and again
after that first kiss
i knew i'd never be the same

I was like a lonely star at night
Waiting for someone to share the light
Love like this no one can take
a way /3x

your love is my love
and my love is all you need

so come on let the music play
we're gon' take it all the way
i love it /3x
wee oh
dance through the darkness
together eternally
so come on let the music play
we're gon' take it all the way
i love it /3x
