La Luna, Save Me From The Night

I show you the door to freedom

Save me from the night
Save me from the night
Save me from the night
Save me from the night
Save me from the night

Save me from the night
and don't leave me now
I want to survive
please baby reach out

Save me from the night
and don't let me be
I want to survive
I want to be free

Save me from my life
It's taking control
I want to survive
to care of my soul

Save me from my life
and don't let me be
I want to survive
you're always with me
