Lacuna Coil, Cold

Skin so cold I knew you'd go away And now I put you down to lay Nothing to feel for you This was our last dance

Closer and closer, it's time to surrender To the desire that you cannot mention Don't try to breathe Don't try to run away

But I'm reaching for the sky (going to fly) Won't you please stay But I'm reaching for the sky (going to fly) Won't you please stay

With a smile I watch you go You'll never know I didn't cry With a smile I saw you die You'll never know I didn't cry

Closer and closer, it's time to surrender To the desire that you cannot mention Don't try to breathe Don't try to run away

But I'm reaching for the sky (going to fly) Won't you please stay But I'm reaching for the sky (going to fly) Won't you please stay

...To fly

No more fear They said you were so weak And now I put you down to lay Nothing to feel for you This was our last dance

Closer and closer, it's time to surrender To the desire that you cannot mention Don't try to breathe Don't try to run away

But I'm reaching for the sky (going to fly) Won't you please stay But I'm reaching for the sky (going to fly) Won't you please stay But I'm reaching for the sky (going to fly) Won't you please stay
