

# Lagwagon, Stop Whining

Can't you see we the people can make the choices  
You and I must raise our voices  
To build a future where we belong  
Revoke oppression and right and wrong  
But do you vote or do you only complain  
Do you just carry on in vain  
As your economy crashes, your country goes to war  
The deficit Their answer to tax the poor  
But you may never know what you refuse to learn  
Do you work the system or do you get burned?  
Do you ignore your abilities or your intellect? Are you obsolete?  
An easy out, you forget it all but it's the hardest path and you chase to follow  
You wouldn't speak for yourself and now you're spoken for  
This is something you can not ignore  
It's time for you to notice the things that die with no more lies  
You can't deny You're always high  
and you still bitch Makes me sick It makes me sick  
the way you always fuckin' bitch  
I remember a time when I thought it wasn't fair  
The scales of justice did impair  
but with no darkness there would never be light  
Without injustice we'd never have a right
