

# Lari White, On A Night Like This

(Deborah Allen & Chuck Jones)

There's a silver sliver in the sky  
And the stars never seemed so bright  
Shining just like diamonds in your eyes  
Something sure feels right  
Montague and Capulet must have met  
Ooo-Ooo

(Baby) On a night like this someone comes along  
And with just one kiss it's a love so strong  
That we can't resist  
And we find out why our hearts exist  
Baby on a night like this

It's the most amazing mystery  
When you're falling hard and fast  
Making a slow-motion memory  
That'll last and last  
In your arms, out of the blue a dream comes true  
Ooo-Ooo

On a night like this when your souls on fire  
And your only wish and your hearts desire is  
At your fingertips  
And you find out why you were born to live.

(Baby) On a night like this someone comes along  
And with just one kiss it's a love so strong  
That we can't resist  
And we find out why our hearts exist  
Baby on a night like this

(Baby) On a night like this someone comes along  
And with just one kiss it's a love so strong  
That we can't resist  
And we find out why our hearts exist  
Baby on a night like this

Baby on a night like this  
Baby on a night like this  
On a night like this someone comes along  
And with just one kiss on a night like this  
On a night like this when your souls on fire  
And your only wish on a night like this

(Fade)
