

# Laura Branigan, Breaking Out

(Diane Warren & The Doctor)

She breathes a sigh  
Watching as her life goes by  
Caught in the trap of a workingday world  
Tired of just being somebody's girl  
She's feelin' her frustration buildin' up inside  
But tonight  
She's gonna give it up  
Break the chains and let it out  
Tonight  
She'll say "I've had enough"  
I'm never going back

Breaking out, into the night  
Breaking out, she's taking flight  
Breaking out, out in the street  
Breaking out, gotta break free

He counts the days  
Wishin' he could get away  
Stuck in the rut of an empty routine  
Nowhere to go with his hopes and his dreams  
Prepare himself for the moment of his great escape  
And tonight  
He's gonna make his move  
Take a chance and risk it all  
Tonight  
He's gonna cut it loose  
Never looking back

Breaking out, into the night  
Breaking out, he's taking flight  
Breaking out, out in the street  
Breaking out, gotta break free

There's gonna come a time  
When you just leave it all behind  
Burst out of your prison and just fly away  
Tonight  
They're gonna make their move  
Take a chance and risk it all  
Tonight  
They're gonna cut it loose  
Never looking back

Breaking out, into the night  
Breaking out, they're taking flight  
Breaking out, out in the street  
Breaking out, gotta break free [fade out]
