

Laura Pausini, I Need Love

I'd cross the desert to be where you are
All the things I do to be close to you
A million miles wouldn't seem that far
I'd go anywhere just to win your heart

But wherever this leads
There's something I need

I need love
The kind that makes you wanna live
The kind that makes you wanna breathe
The kind that makes you feel too much
And I need you
To help me find a better way
And I guess you never thought to hear me say
I need love
I need love

And when I see you I just lose my mind
You're the everything I thought I'd never find
Must be an angel watching over me
With a little luck we're gonna make you mine
'Cause I wanna believe (I wanna believe)
In all we can be (all we can be)

I need love
The kind that makes you wanna live
The kind that makes you wanna breathe
The kind that makes you feel too much
And I need you
To help me find a better way
And I guess you never thought to hear me say
I need love
I need love

And oh, I will catch you when you fall
Be the greatest love of all
I promise to be
If you give me what I need, I need

I need love
I need you
The kind that makes you feel
The one that makes you wanna live
The one that makes you wanna breathe

And I need you
To help me find the better way
And I guess you never thought you'd hear me say
I need love
I need love
I need love, baby
I need love

I'd cross the desert
I'd cross the desert to be where you are
