

Leaf-Fat, Winter Song

Hide your face in your gold
And dont come out
Cos the world is made of leaders in the crowd

I despise the shining on you
Dont even want to look inside of you
Your barking- result of pushing your fears away!

Weve got nothing uncommon
Just like night & day

Your ignorance has shake the ground
Your hatred is fighting in this round
This is the way you wanted to be

I dont understand
That you feel no remorse
We are not here to be mocked
So show us the doors

We are not first or the last
Who'l turn the back on you
Shut your fucking mouth
Figure it out on your own!!!

And you know that you always wanted to be like that
And you know that at first youve tried to sacrifice your life just for me
Just for me, you have tried to sacrifice !!!
Sacrifice !!! (dont wanna be, want it this way)
