## Leah Andreone, Saturday

Can you climb any higher Get out on a limb Hold a smile for hours The walls are caving in I feel the pressure I need a holiday binge

Can you climb any higher So I can feel it Lose your mind any faster Time is running out I need a moment To scream and shout

I think it's best if we stay together I could hold you through all the stormy weather I'll serenade you until your troubles are drained You need an escape

Saturday wasting away Let's let go and celebrate Saturday give it a break Waste the day and celebrate On a Saturday

Can you squeeze any harder So I can feel it Scream a little bit louder Louder than the rest I'm not breathing I can't catch a breath

I think it's best if we stay together I could hold you through all the stormy weather I'll serenade you until your troubles are drained You need an escape

Saturday wasting away Let's let go and celebrate Saturday give it a break Waste the day and celebrate

Saturday wasting away Let's let go and celebrate Saturday give it a break

The days are long
The song is sounding the same
You're wondering how
You're gonna get through the day
And you're so tired
This life is insane
But it's all right
Let go for a change
Let go for a change

Chorus
