

# Lee Greenwood, Ain't No Trick (It Takes Magic)

Ain't no big deal to lose, I keep telling myself,  
I get used to the blues, I won't stay on the shelf, I'll find somebody else  
They say that love is sweeter the second time around  
But I'm way past that number somehow  
You'd think that even a fool like me could have found true love in my life.

Chorus:

Ain't no trick to make love come to you, no matter what the people say.  
Ain't no trick to make love come to you but it takes magic to make it stay.

It's just a part of the game, I keep telling myself  
Hard luck found out my name, I let my bridges burn, but I'll just live and learn  
They say that love is sweeter the second time around  
But I'm way past that number somehow  
You'd think that even a fool like me could have found true love somehow
