

Leech, Solar Kid

Solar Kid

Born from the dust
On times of lust
Spring to life again
Seven feet and toes
Something it knows
Reciting The End
The beast has risen to our death
Can't we call for someones help

Help is always near, hey

Like the bullet trail it glows
Taking on the enormous foe
A gush of wind and a single blow
It will end before it has begun

Protecting the streets
And the blue skies
Kid Solar you must fly high
In your head we'll survive

I am coming to save your world
I am coming to save your world
I am coming to save your world
I am coming to save
And coming to shine
Shine on

Over the circles of crop
A child walking on powerfields
Mastering the universe
Truth you see, might be close

Protecting the streets
And the blue skies
Kid Solar you must fly high
In your head we'll survive
Protecting the streets
And the blue skies
Kid Solar you must fly high
In your head we'll survive
