

Lemon Demon, Space Mission Alpha

Outer space is on my mind.
I would leave the Earth behind
To see the other galaxies,
To float to any world I please,
To know the secret, escape the curse,
To be one with the universe,
And

Rocket ships! (Rocket ships!)
Astronauts! (Astronauts!)
Aliens! (Aliens!)
Laser beam blaster shots!

Planets exploding
And spaceships exploding.
Voluptuous alien vixens exploding.

And life would be fantastic in the place
That we call outer space!
