

# Leonardo'S Bride, Disappear

You make me feel like I'm so worthless  
You cut me down like a pedestrian  
You make me run when I'm happy walking  
You pick me up and put me down again

I don't need you hanging round me  
I don't need you in my ear

I look at you and it makes me nervous  
I hope I don't turn out that way  
You're so caught up in your public service  
You're so lost in what your friends will say

I don't need you hanging round me  
I don't need you in my ear  
I don't need your conversation  
I just wish that you would disappear

You say it's only 'cause you're worried about me  
I'm not worried so why should you  
You better get another occupation  
There's got to be something else to do

I don't need you hanging round me  
I don't need you in my ear  
I don't need your conversation  
I just wish that you would disappear
