Leonardo'S Bride, Disappear

You make me feel like I'm so worthless You cut me down like a pedestrian You make me run when I'm happy walking You pick me up and put me down again

I don't need you hanging round me I don't need you in my ear

I look at you and it makes me nervous I hope I don't turn out that way You're so caught up in your public service You're so lost in what your friends will say

I don't need you hanging round me I don't need you in my ear I don't need your conversation I just wish that you would disappear

You say it's only 'cause you're worried about me I'm not worried so why should you You better get another occupation There's got to be something else to do

I don't need you hanging round me I don't need you in my ear I don't need your conversation I just wish that you would disappear
