## Lesley Roy, Make It Back

I was blinded by you I got lost in your eyes Too afraid to find you

And too late to read the signs

To read the signs

I was young and foolish

Didn't know how to love

Now I see the truth in

All that's left undone

Now I know that I need you

Only hope is just to see you

Scream your name through the silence

See your face in the distance

'Cause I'm crawling

And falling

Whatever I must do

To make it back to you

Feel you with me always

In everything I do

Now a day is dawning

We can make it through

'Cause I know that I need you

Only hope is just to see you

Scream your name through the silence

See your face in the distance

'Cause I'm crawling

And falling

Whatever I must do

To make it back

Praying for a second try

To be in your arms

Now that I have realized

Just who we are

You're the one that makes me feel alive

Now I know that I need you

Only hope is just to see you

'Cause I know that I need you

Only hope is just to see you

Scream your name through the silence

See your face in the distance

Now I know that I need you

Only hope is just to see you

Scream your name through the silence

See your face in the distance

'Cause I'm crawling

And Falling

Whatever I must do

To make it back to you
