

LFO, My Block

It sounds so good

It sounds so nice

(chorus)

Come down to my block

Come around my way

That's where the players play

On my block

Do what you wanna do

Fill up your cup with gin and juice

Come down to my block

We'll give you what you need

We're on the gs3's

I think it's plain to see

It's definitely the place to be

The sun is beaming

Another saturday

It's time to kick it

And throw my cares away

Nobody trippin'

Just tryin' to have some fun

And if you need some

Got drinks for everyone

This is your chance tonight everything's gonna be alright

Let's hit the store

It's time to drink some more

(chorus)

Come down to my block

Come around my way

That's where the players play

On my block

Do what you wanna do

Fill up your cup with gin and juice

Come down to my block

We'll give you what you need

We're on the gs3's

I think it's plain to see

It's definitely the place to be

Come down to my block

Come take a ride with me

In a big, black truck

And all of you player haters

Won't you get off my nu**

I know a place you can go

And meet everybody, I know

It's got all the things a player likes

Like sunshine and straight times and

You can play everyday

It's summertime baby

So in the bed if you wanna stay

In case you didn't know

(chorus)

Come down to my block

Come around my way

Come on

That's where the players play

On my block

Do what you wanna do

Fill up your cup with gin and juice

Come down to my block

Well give you what you need

We're on the gs3's

I think it's plain to see

It's definitely the place to be
Come down to my block
So bring some cogniac
We're gonna have a real good time
Yeah, and you can't have none of mine
All you ladies bring your friends
Got a pool to throw 'em in
Oh yeah, it's goin' down tonight
It's all right on the west side this is your chance tonight
Everything's gonna be alright
Let's hit the store
It's time to drink some more
(chorus)
Come down to my block
Come around my way
That's where the players play
On my block
Do what you wanna do
Fill up your cup with gin and juice
Come down to my block
We'll give you what you need
We're on the gs3's
I think it's plain to see
It's definitely the place to be
(repeat chorus)
