## LFO, Your Heart Is Safe With Me

I know you know that love can make you cry and break your heart and you can never fall, you can never fall and so you're so afraid to let somebody in baby won't you try again, try again

"cause your heart is safe with me
I'll never hurt you
I'll be there through everything
I won't make you cry
I know this world is cold but in my arms you'll see
that your heart is safe with me
that your heart is safe with me, safe with me

what can I do for you to make you understand, you're in good hands I'll never do you wrong, never do you wrong

what can I say to make your doubts all dissappear I won't let no tears get near, no baby, I'll be here

======chorus======

I will be there for you be anything you need love can last forever I'll show you how it feels I'll keep my heart beside you so your heart will see that you heart is safe with me that I'll never hurt you

======chorus 2 to fade======
