

# Liege Lord, Fear Itself

[Lyrics: Vinci]

[Music: Truglio/Nelson]

Into the madness, and back out of sight  
Like ten thousand strong, we burn on through the night  
An endless vision, carries us through life  
The fear that breaks down all the rest  
Dares not to doubt our might

A vein of violence, bleeds pulse into our veins  
Always when the smoke is clear,  
Our union still remains  
We're opposition, oppressors of the norm  
The fear that seems to flourish  
Shall always be ignored

[Chorus:]

Fear, it tempts our lives  
There's nothing to fear  
It's just a lie  
Fear, it's in yourself  
There's nothing to fear  
But fear itself

Hear the losers, their tears won't dry  
The beggars and choosers, afraid to die  
To last nine lives, but while we're here  
We don't run or hide

[Repeat chorus]

In this life, there comes a time  
When the fear around you, takes you off your stride  
With two cold faces of low and high  
Follow us, we'll help you decide  
You'll never know if you never try

[Repeat chorus]
