

Lifehouse, Better Luck Next Time

Sometimes we fall
Ain't nothing new to me
Don't get me wrong
I'm a son you gave up for this child now

Stop tell me where you going
Maybe the one you love isn't there
You're going under
But you're over it all so you don't care about all that I had to see
Watch you wait until you come around
Around

Don't close your eyes
You need to see it all
It's no surprise
Did they break you down
Least they won't give you up

Stop tell me where you going
Maybe the one you love isn't there
You're going under
But you're over it all so you don't care about all that I had to see
Watch you wait until you come around

It's all wonderful
Living happily
Till you lose it all
Think you have everything

Stop tell me where you going
Maybe the one you love isn't there
You're going under
But you're over it all so you don't care about all that I had to see
Watch you wait until you come around
Around

Stop tell me where you going
Maybe the one you love isn't there
You're going under
But you're over it all so you don't care about all that I had to see
Watch you wait until you come around
Around
