

# Lifehouse, Goodbye

Take your medicine and swallow it down  
Drown your sorrows in a bowl of pain now  
You've got the confidence You have the smile  
Fool everybody even yourself for awhile

(chorus)

So take your suffering and be done with you  
I am sorry I can't come there with you  
So pack your pain in a suitcase full of lies  
I guess this is where we say goodbye

Oh I'm so complicated I was so torn  
Between two lies don't make a treatment  
[unintelligible]  
You said you're growing up and what you became  
I think you're changing into a different version of the same

(chorus)

So take your suffering and be done with you  
I am sorry I can't come there with you  
So pack your pain in a suitcase full of lies  
I guess this is where we say goodbye

[unintelligible] Was the last time you bringing me down  
Nothing's the same Now that you're not around  
Everything has changed Now that you're not around

(repeat chorus)

I guess this is where we say goodbye  
I guess this is where we say goodbye
