Lil' Rob, Natural High

been busy, been busy, been busy.....

lighter sparking up *inhale, cough*

{Lil' Rob speaking}
What's up?
Lil' Rob
Back on my own
The way it should be
The only way that it can be
Let's take to the sky

{Lil' Rob} Pack my pipa full of grieffa Just like my woman I could never leave her, cheat her, need her So I take a puff and another puff Exhale, then I take a breather Cause I'll take my time and do it right I know where I'll be tonight Clouding the night in my mind Feelin' fine, this is mine You wanna get high? Well come back another time When you really want to fly Cause I plan to take it to the point Where I don't know my name Won't even know where I'm at But want to come back To this place, where I sit Rather your lips will take a hit Prepare for licked, bring the pipe Or a spliff I hit is swiff God's gift, to this world, got me in a twirl In a whirl, everything I see is plural I'm just blasing, hallucinating And I can't lie, smoking crepa chocolate tie Lemon teardrops falling from my eye Take to the sky, on my natural high Till the day I die

{chorus}

Take to the sky, of the natural high Loving you more till the day I die Take to the sky, of the natural high Loving you more

{Lil' Rob} I can smoke it on my own leva alone I'm in my zone Stoned to the bone Me in the dark, sittin' in the park Forgettin' everything that hurts my heart So I spark another joan, what's the poem? Escape from reality, into a fantasy That's sexuality, feel the passion When the smoke is passin' Everlastin' type of bud When I smoke my buds Takes me to a place Smile upon my face Cause she sets me free

From the things I see
Let me be somebody, hear my plea
It's only me, I'd rather be lonely
Roll it on my own, cause I hold my own
Toke it on my own, used to think of dyin'
Now I think of flyin', like I've never flown
Spread my wings and fly
Why lie? It's something that I can't deny
Take to the sky, on my natural high
Till the day I die

{chorus}

Take to the sky, of the natural high Loving you more till the day I die Take to the sky, of the natural high Loving you more

{Lil' Rob} Life is like a maze Gots me in a craze So I hide away in marijuanas maze Change my evil ways Stay another day Captured in the rapture Love the way she plays Gots me feelin' weariness Dizziness, love it when I feel like this I'm real like this, smokin' all this flavored shit It's time to call it quits But once again my lighter flicks And I take another puff Just can't get enough Of this happiness Smoking canibus Devotion to my potent potions What I've chosen, love it when my time is frozen Gots me in that motion, like I'm close to floatin' Takin' to the sky, when I want to fly And I'm sittin' on my cloud, like Joe Buton Don't stop now, la grafepa gone, and I'm gone It's the wicked, slicked, slide, type a guy With, it's something that you can't deny Take to the sky, on your natural high

{chorus}

Till the day you die

Take to the sky, of the natural high Loving you more till the day I die Take to the sky, of the natural high Loving you more

Ooooo Lil' Rob Roll me another, mmmmm Feels so good up in my chest No stress When I'm smoking on Maryjane Ooooo, she's callin' my name No doubt about it Yeah, yeah, yeah Take to the sky

{chorus}

Take to the sky, of the natural high Loving you more till the day I die Take to the sky, of the natural high Loving you more

Take to the sky, yea
