

# Lind Espen, All I Want Is An Angel

I saw her first  
She came around  
That day my angel came to town  
This is just a love song  
Her shine was white she rode the light  
She let her wings go where they might  
cos she looked to be a wild one  
She just got in my car and said  
"boy take me to wherever you want"  
All I want is an angel  
And I know she will stay on my mind all the way  
All I want is an angel  
One like you  
Like you  
We drove all day we didnt stop  
Along the way until the top  
Of the cliff by the sea  
She played her tapes of afghan wigs  
cos thats the rocknroll she digs  
It was all a fantasy  
And when the night tumbled down on us  
Her name was tattooed over my heart  
All I want is an angel  
And I know she will stay on my mind all the way  
All I want is an angel  
One like you  
Like you  
The moon was high and so was I  
cos I was drowning in her eyes  
And while the waves crashed to the shore  
I would politely ask for more  
I didnt even know her name  
But frankly that was all the same  
Because I just could not believe  
That this was happening to me  
All I want is an angel  
I can hold on a leash  
Who will do what I please  
All I want is an angel  
Just for me  
For me  
All I want is an angel  
And I know she will stay on my mind all the way  
All I want is an angel  
One like you  
Like you
