Linda Eder, This Time Around

This time around I'll take the moment This time around I'll make it last I've had my share of wasted moments But this time around I'm holding fast This time around I will be stronger Stronger than I've been before I'll find the sky and soar This time around This time around I will be daring I'm going where I've never been This time around luck will come knocking And when he does I'll let him in This time around - No second places I'm showing aces - I'll win I'm gonna have it all This time around Love, I'm gonna find you Happiness, I'm right behind you I've had my share of crying But there's no denying I'm on my way This time around I'll taste the glory And I'm not going down without a fight This is my life, my own story And this time around I'll get it right This time around, I'm gonna find it Look out world, watch me shine, shine I'm gonna grab that big brass ring And I'm gonna make it mine This time around, I'm gonna make it mine
