

Lindsay Lohan, First

Is that someone you used to date
Why she's hanging around here, what's her story
Doesn't she know that its too late
That the party is over and the car is for me

Why don't u tell her what's been going on
Cuz she seems to be dreaming instead of just leaving
If you don't have the heart to fill her in
Then just step aside and let me lay it on the line

Cuz your mine
And tonight you don't revolve around her
Your mine
And this time I'm gonna scream a little louder

[Chorus:]
Don't wanna be like
Every other girl in the world
Like every other one who wants you
Cuz when I see you something inside me burns
Then I realize I wanna come first
I wanna come first

You look at me and I just die
Its like heaven arriving in my mind
And I cant believe all this jealousy
I used to be a girl who could let a guy breathe
But your mine
And tonight you revolve around me
Your mine
And this time I'm gonna get a little louder

Don't wanna be like
Every other girl in the world
Like every other one who wants you
Cuz when I see you something inside me burn
And then I realize I wanna come first
(I wanna come first [2x])

Don't wanna be like every girl who's tried to get you
I wanna be the one who's never sorry that she met you
I wanna come first [2x]
Hey!

[Chorus 2x]
