

Lindsay Lohan, If It's Alright

I should've known the day we met
The way you turned and waved at me I never will forget
Two years later whoda guessed
That we would make it this far just to put it all to rest

And if it's alright I'll stay until it's late
Until you tell that it's time that we moved on
And if it takes all night I'll wait here til the daylight
So that I can see that we just don't belong
It's alright we were wrong

If your crazy then I'm insane
Tow people with the same condition, it never goes away
It's not our problem anymore
But let's just call it even when I'm walking out the door
And oh ,it won't be easy 'cause it was hard from the start

And if it's alright I'll stay until it's late
Until you tell that it's time that we moved on
And if it takes all night I'll wait here to the daylight
so that I can see that we just don't belong
It's alright we were wrong

Must've met for some reason
It's in the sky
Something from up high
We must have lived for some reason
It wasn't a lie
It just wasn't right [2x]

And if it's alright I'll stay until it's late
Until you tell that it's time that we moved on
And if it takes all night I'll wait here to the daylight
So that I can see that we just don't belong
It's alright we were wrong [2x]
