

Lindsay Lohan, Who Loves You

I can tell you things nobody knows
I've been everywhere nobody goes
Nothing gets me off the way that you do
You drive me crazy when you step in the room

Something 'bout your lips something about your kiss
Something 'bout your eyes keeps you on my mind
Thought it was nothing
Turns out it is something
You're the one that keeps me up every night
Whooo loves you [2x]
I think I do
Yeh, yeh, I think I do

You've crawled under my skin and I feel you there
You're with me all the time you come everywhere
When I needed space I pushed you away
But then I want you back, you're hard to erase

Something 'bout your lips something about your kiss
Something 'bout your eyes keeps you on my mind
Thought it was nothing
Turns out it is something
You're the one that keeps me up every night
Whooo loves you [4x]
I think I do

You're hard to erase

I think I do, I think I do

I can tell you things nobody knows
I've been everywhere nobody goes
Nothing gets me off the way that you do
You drive me crazy when you step in the room
Whooo loves you [4x]
