

# Lindsay Robins, What Would You Do

Are you ready for your close-up  
Give me that million-watt smile  
Let's see you try to keep your cool  
While your heart's running wild

Keep your eyes on the prize and your head in the game  
'cause any second now they'll be calling your name

What would you do what would you do  
To get what you want make it all come true  
What do you say when everyone's watching you  
And all you've got is today  
What would you do

So you're walking on a tightrope  
And it's your turn to dance  
You could lose it in a heartbeat  
And there's no second chance

'cause the time's running out and the room's getting hot  
You better take a deep breathe 'cause this is your shot

What would you do what would you do  
To get what you want make it all come true  
What do you say when everyone's watching you  
And all you've got is today  
What would you do what would you do  
To kick down the doors and really break through  
What do you say when everyone's watching you  
And all you've got is today  
What would you do

Turn it on crank it up and scream out loud it's up to you  
Shake it up take it off let it all hang out maybe come unglued

What would you do  
What would you do  
What would you do  
Oh

What would you do what would you do  
To get what you want make it all come true  
What do you say when everyone's watching you  
And all you've got is today  
What would you do what would you do  
To get what you want make it all come true  
What do you say when everyone's watching you  
And all you've got is today  
What would you do what would you do  
To kick down the doors and really break through  
What would you do
