

# Linkin Park, One night

We stood upon the edge  
Eyes fixed in the sky  
Just before twilight  
Claimed the lights  
Wind carried voices  
Over the waters  
From a whisper  
Into a scream

We got this one night to make it real  
For tomorrow is too far from here

The words that we cast  
Into eternity  
They still echo in my ears  
And in my dreams  
So meet me tonight  
In the place that time forgot  
And take with you  
All that you can't leave behind

We got this one night to make it real  
For tomorrow is too far from here

Headlights open  
The road ahead  
They can't light up the sky  
But they can light our way

We got this one night to make it real  
For tomorrow is too far from here
