

Lion Shepherd, Fail

The system failed
The throne is empty
There is no faith
Only survival

Season to kill
Is open up again
Great armies march
We in between waiting

And If we drown you're going with us
We'll suck you dry don't be surprised

We got reasons to kill you now
With fear and hatred poison your minds
Million reasons to shock you now
To take from you the things you love
Just like you did

How many Times we sang this tune
That tables finally starting to turn
And self-determination shall overcome
This time the truth will finally be found
This time the truth will finally be found

here comes the heat
here comes the fire
It's gonna burn
faith and desires

And If we drown you are going with us
We'll drag you to the bottom of hell
We've been there we know the way very well
We'll suck you dry like you always did

We got reasons to kill you now
With fear and hatred poison your minds
Million reasons to shock you now
To take from you the thing you love
Just like you did
