

Lionel Richie, Just To Be With You Again

So I still walk on through the night and through the rain
I would give it all
Just to be with you again

It's a lonely road
For my heart is still in chains
But I live my life just to be with you again

We have walked together where angels go
And we found a place inside us that only we could know

So I still walk on through the night and through the rain
I would give it all
Just to be with you again

That's the way life goes
I go whispering the wind
But I take that for
Just to be with you again
Can I find a reason
Can I find a way
Cause the words I need to tell you
Are the words I didn't say

So I still walk on through the night and through the rain
I would give it all
Just to be with you again

I see you standing in the doorway
With that looks in your eyes
And the feeling that I feel will never die

So I still walk on through the night and through the rain
I would give it all
Just to be with you again

Well that's the way life goes
I go whispering the wind
I would give it all
Just to be with you again
It's a lonely road
For my heart is still in chains
But I live my life just to be with you again
