Lisa Loeb, Would You Wander

If it's really love You would follow it forever Would you wander for me? Even though you think I'm lost And you know better Would you wander for me?

[Chorus]
This wandering is more than filling
Footprints right behind me
How far would you go outside
The lines just to find me
Letting go of anything that grounds us
Would you wander for me?
Even though there's darkness all around us
Would you wander for me?
'cause I'd wander for you
[Chorus]

When you see that I am gone
To the edge and way beyond
Would you, would you, wander for me?

Doesn't matter where we are We can be our northern star Far above the earth and weather Together [Chorus]

When you see that I am gone
To the edge and way beyond
Would you, would you, would you wander for me?
Would you wander for me?

If it's really love you'd follow it forever Would you wander for me?
