

Lisa Stansfield, First Joy

Only in my dreams
I've seen the way it's gonna be
I've waited for this moment
The moment when we share ourselves This moment can't be thought about
It has to be felt
We're closer to each other Closer than we've ever been
Seeing things things we've never seen before
I've dreamed your fingers touch me a thousand times Dreamed the warm skin of your
body burning next to mine Kissed your sugar lips, carressed your hips
Now we're together baby now it's time. .
Time to make you mine Time to make you mine
The sweet anticipation of hands I know will touch me soon Two fascinating shadows
move in time
spoken. . .
I know what it's gonna be Me and you you and me
I thought that it would never be
I only knew it in my dreams Even though you`re here with me
I never thought I`d feel such ecstasy
We`re closer to each other Closer than we' ve ever been
Seeing things things we' ve never seen before
