## Lisa Stansfield, Live Together

(L. Stansfield/I. Devaney/A. Morris)

Spoken:

This is all we need, to be free,

To understand, and find the answer

So let's do it now, let's do it right now...

We've got to live together if we're gonna be free

We've got to find the answer right now

We've got to live together

We've got to see each other for whatever we are

We've got to solve the problem

Together

We've got to live together

Look at me, I'm the honest kind

When I say it, I mean it

I swear I need you all my life

All we need is sympathy, if we want to change our minds

This is no second thought, this is for all times

All my life

This has got to be forever

Whatever

Whatever's come, whatever's been,

It's livin' life for what we see

Promise not to lose our hope

We

We've got to live together if we're gonna be free

We've got to find the answer right now

We've got to live together

We've got to see each other for whatever we are

We've got to solve the problem, right now

We've got to live together

Live together

We're gonna give it all that we got

We'll believe it whether or not

Lovin' ourself and loving our hearts

Love is seein' all that we are

We're gonna do it, do it right now

Love is there, it's showin' us how

We can do it, we can live together

You don't need no reason to hold your head up high

A little pride so you can justify your whole life

This has got to be forever

Whatever

Whatever's come, whatever's been,

Livin' life for what we see

Promise not to lose our hope

We

We've got to live together if we're gonna be free

We've got to find the answer right now

We've got to live together

We've got to see each other for whatever we are

We've got to solve the problem

Together

We've got to live together

We've got to live together if we're gonna be free

We've got to find the answer right now

We've got to live together

We've got to see each other for whatever we are

We've got to solve the problem, right now

We've got to live together

Live together

We're gonna give it all that we got

We'll believe it whether or not

Lovin' ourself and loving our hearts

Love is seein' all that we are

We're gonna do it, do it right now Love is there, it's showin' us how We can do it, we can live together
