

# Live, The Ride

in the east they can meditate they can recreate the sound of OM  
and bring us home i think i'll go there someday maybe  
for a holiday maybe just light a candle and take a seat for the ride

you don't need no money to fly to truly fly away you don't need no car  
to truly ride to truly ride away

in the west we think we're the best we've shown the whole wide world  
that money is all we care for now someday the scientists  
will see there's no such thing as gravity they'll all just light a candle  
take a seat for the ride

you don't need no money to fly to truly fly away you don't need no car to truly,  
truly ride to truly ride away

as you ascend in silence all doubt behind thee you reach the summit  
my friend and find your destiny
