

LIZ PHAIR, Everything (Between Us)

we have everything we need here
we have everything between us
you have nothing left to fear dear
cause it ain't ever gonna leave us

we might get a room downtown now
get away for a half day
we might drive a car to the next town
get away from our family

let your body move real slow
tell your body we left yesterday
let your body hold me close
let your body move you
we have everything we need here
we have everything between us

you have nothing left to fear dear
cause it ain't ever gonna leave us

let your body move real slow
tell your body we left yesterday
let your body hold me close
let your body move you

let your body move real slow
tell your body we left yesterday
let your body hold me close
let your body move you

let your body move real slow
tell your body we left yesterday
let your body hold me close
let your body move you

we have everything we need here
we have everything between us
