

LIZOT, What They Want

We don't need nobody tell us what we like
We keep it working, keep it going, that it's Friday night
And if you wanna do it, baby, better do it right
So listen up now, I got some advice

Just give the women what they want, what they want
I know you know, a little won't kill nobody
Oh, that's what we want
I know you know, a little won't kill nobody

Just give the women what they
The women what they
The women what they
A little won't kill nobody
Just give the women what they
The women what they
The women what they
A little won't kill nobody

A little, won't kill nobody
A little, won't kill nobody

We don't need nobody tell us what we like
We keep it working, keep it going, that it's Friday night
And if you wanna do it, baby, better do it right
So listen up now, I got some advice

Just give the women what they want, what they want
I know you know, a little won't kill nobody
Oh, that's what we want
I know you know, a little won't kill nobody

Just give the women what they
The women what they
The women what they
A little won't kill nobody
Just give the women what they
The women what they
The women what they
A little won't kill nobody
