

Lizzo, If You Love Me

Ooh

I've learned to love me as myself
But when I'm with somebody else
I question everything I know
How can you say I'm beautiful?

When the world can't love me to my face
When the mirror lies and starts to break
Hold me close, don't let me run away
Don't be afraid
'Cause if you love me, you love all of me
Or none of me at all

I accept the things that I can't change about you
But can't accept the fact that I can't change myself too
Wish I could fall in love with me so easily like you did
Being good to me like I am someone else seems so back-handed

When the world can't love me to my face
When the mirror lies and starts to break
Hold me close, don't let me run away
Don't be afraid, oh
If you love me, you love all of me
Or none of me at all

Everything the light touches
All, baby, give me light touches

When the world can't love me to my face
When the mirror lies and starts to break
Hold me close, don't let me run away
Don't be afraid (Oh, yes)
When the world can't look me in my eyes (Look me in my eyes)
When the darkness takes over my mind (Takes over my mind)
Hold me close, don't let me run away (Don't you be afraid, no, no, no, no, no)

When the rain falls and I'm locked outside
While your feet, they're standing by my side (Standing by my side)
Hold me close, don't let me run away
Don't be afraid, no, no
If you love me, you love all of me
And if you love me, you love all of me
Or none of me at all

If you love me
If you love me
If you love me
