

# Lobo, I Don't Want To Want You

(Roger LaVoie)

They tell me you are back in town  
Looking good and looking around  
Acting just a little strange  
Like something inside you has changed

They say you're asking about me  
Am I well and am I free  
And would I take you back again  
Well this is how it is old friend

I don't want to want you any more  
I don't want to need you like I needed you before  
I don't want to love the way you love  
I don't want to want you any more

Those sleepless night's I lay like stone  
Knowing you were not alone  
Hurt me in so many ways  
All that's left for me to say
