

Lobo, Love Is Approaching

(Kent LaVoie / Billy Aerts / John Greenebaum)

I've heard about what hurricanes can do
I've seen the power of a cyclone too
But that's nothing close to what I see
When you look at me

There's something coming we both know
A force of nature we can't control
Like an avalanche down a mountain side
You can run but you can't hide

Just like lightening from a clear blue sky
Or distant thunder on a starry night
Just like a storm rolling in from the sea

Love is approaching you and me
And it's just something that's gonna be
Once it's in motion it's a tidal wave
Love is on the way - love is on the way

Caught up in a tide we can't turn back
I guess we better just face the facts
This feeling that we're stirring up
Is bigger than the both of us
