

Lobo, Our Best Time

(Lobo)

When I looked up and saw you there
All I could do was to sit and stare
Cos after the way we saw it all end
I never thought I'd ever see you again

It seems we got our priorities mixed
And that's how we got our self's in this fix
Too concerned with what was going on around us
Back when we didn't care we didn't fuss

After it all is said and done
Being apart just ain't no fun
It's all so clear in my mind
Being in love was our best time

So lets back it up get all straight
All petty things will just have to wait
Let's put the horse back in front of the cart
What's between me and you
Is the important part
