

# Lobo, Someone To Love

(Lobo)

Well it's another one of those nights  
The rain is falling down out side  
You want to be with someon special  
You want to get away and hide  
You feel all depressed and lonely  
Like that rain on the roof above  
You think you're missing someone  
You once knew  
But what you're missing is  
Someone to love

Someone to love someone to love  
What you're missing is someone to love  
Someone to love someone to love  
What you're missing baby  
Is someone to love

So you go out and you go cruising  
And you meet some guy in a bar  
And he takes you home and he loves you  
But that don't take you very far  
Cos when the thrill is gone  
You get restless  
So you take your things and go on home  
But when you get there you feel all empty  
Cause you know that you're still alone

Without someone to love someone to love  
What you're missing is someone to love  
Someone to love someone to love  
What you're missing now  
What you're missing baby  
Is someone to love

Someone to love

Someone to love someone to love  
What you need is someone to love  
Someone to love someone to love  
What you need baby what you need  
What you need is someone to love
