

Logan, When I Get Down

Watch me, as I fall
There's no one around to catch
Me, anymore.

I've been, up so high
Forgotten what it's like
Here, below

--Semi Chorus--

When I get down, when I get down
When I get down

Trusting me will, see this through
Just remember who I am...
Always..
I've tried to, find a way
To sail us through this storm
Hold on, hold on now

--Chorus--

When I get down, when I get down
When I get down
When I get down, when I get down
When I get .. Whoaa

You know i've been down this long and
lonely road once before

And now I seem to be face to face with
What i've been hiding from

And I just seem to be growing up in my basement
And now..
Can't you see that.. Nothings changed, it's all the same
Take my hand.. We got to work (this one out)

--Chorus--

When I get down, when I get down
When I get down
When I get down, when I get down
When I get .. Down

--Solo--

Yeah Yeah .. Yeahh
Yeah Yeah .. Yeahh
If I make it down
I will kiss the ground
Pick you up again
Turn this smile around

When i make it down
And it takes it all
Which I promise you

When I get... Down!
