

Lola Ray, Time Is Industry

Come along with me you have much to see,
the surface is revealing
Take a look inside trouble is you'll find,
the purpose is deceiving

Time is industry it owns a part of me
im living in this world because im scared to leave
Peace and harmony dont mean a thing to me
Im done with love and make-believe

Careful what you say
Propositions lay at your feet, please step gently
Intentions never hide no matter how you've lied
The truth cuts through completely

Time is industry it owns a part of me
im living in this world because im scared to leave
Peace and harmony dont mean a thing to me
I'm done with love and make-believe

It's killing me in front of you
I don't know what else to do
Cause i can't save your life too

Time is industry it owns a part of me
I'm living in this world because im scared to leave
Peace and harmony dont mean a thing to me
I'm done with love and make-believe
